

RAMIL CHUPONOV

Data Analyst | Python | Power BI

Alor Setar, Kedah, Malaysia | ramchuponov@gmail.com | +60 11-6415 9341 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Data Analytics graduate skilled in SQL, Python, Excel, and Power BI, with practical experience in data cleaning, exploratory analysis, KPI development, and dashboard creation. Strong analytical and problem-solving abilities with a focus on transforming data into actionable business insights.

SKILLS

Data Analytics: Python, Pandas, NumPy, EDA, Data Cleaning, SQL

Business Intelligence: Power BI, DAX, Power Query, Tableau, KPI Analysis, Data Visualization

Programming & Web: Java, C++, PHP, HTML, CSS, JavaScript

Tools: Excel, MySQL Workbench, Git, GitHub, Google Colab, Jupyter Notebook, Matplotlib, Seaborn

PROJECTS

E-Commerce Revenue Analytics

Python | Pandas | SQL | Power BI

- Analyzed e-commerce data using Python, Pandas, and SQL to identify revenue, AOV, sales, and customer trends.
- Conducted cohort and retention analysis to uncover customer purchasing patterns.
- Developed an interactive Power BI dashboard to visualize KPIs and validate analytical results.

Banking Risk Analysis

Python | Excel | SQL | Power BI

- Analyzed banking data using SQL, Python, and Excel to identify loan risk and customer trends.
- Built an interactive Power BI dashboard with DAX measures and dynamic slicers to track loans, deposits, clients, and key KPIs.
- Presented insights on 3,000 clients and \$4.38B in total loans, supporting data-driven lending decisions.

CyberEscape - A Gamified Cybersecurity Awareness Platform

HTML | CSS | JavaScript | Python

- Developed a 2D web-based cybersecurity game with five levels covering phishing, passwords, malware, encryption, and network security.
- Built interactive features including scoring, timers, hints, badges, and leaderboards using Python, Flask, HTML, CSS, JavaScript, and SQLite.
- Applied Agile Scrum and conducted user testing to evaluate usability, engagement, and learning effectiveness.

AI Emotion Persona Detector Overlay

Python | OpenCV | DeepFace | TensorFlow

- Developed a real-time facial expression analysis application using OpenCV, DeepFace, and TensorFlow, with a dynamic AI persona overlay responding to live expressions.

EDUCATION

Foundation in Computing	Mar 2023 - Jan 2024
Albukhary International University - Kedah Malaysia	
Foundation Studies (CGPA: 3.34/4.0)	
Bachelor in Computer Science (Honours)	Mar 2024 - Present
Albukhary International University - Kedah Malaysia	
CGPA: 3.53/4.0	

EXPERIENCE

Freelance Graphic Designer	Sep 2025 - Present
- Designed logos for a local football team and a cleaning company using Canva, tailoring each to reflect the brand's identity - Delivered final design assets in formats suitable for social media, print, and merchandise use	
Freelance Web Developer	Sep 2025 - Present
- Built custom websites for small local businesses, including a cleaning company and a tourism company - Worked directly with business owners to understand their goals and translate them into simple, user-friendly websites that helped attract customers - Handled the full process independently - design, development, and content layout to deliver each site on a tight budget and timeline	

CERTIFICATES & ACHIEVEMENTS

Google AI Essentials - Coursera	Aug 2026
Data Analyst Certificate - ALX Africa	Sep 2026
Dean's List Award for academic excellence	Aug 2024
High Scholastic Achievement - Foudation studies	Oct 2023
